1. Tracing your hand assignment:

You will need to trace your hand 3 or 4 times depending on if you have a big hand or a small hand. Be sure you hold the pencil straight up and down so you don't make your fingers look too skinny. Then use a black marker or sharpie to trace over the pencil lines from tracing your fingers. You have created several new areas to color in this design that you have created. Use colored pencils or makers to color this design in. Use at least 4 colors to do this design.

Just email me a picture of the completed traced hand design page.

2. Name in block letters assignment:

You will use lines like you did with the 16 square line drawing to fill in each letter of your name. Use colored pencils or markers to draw those different kinds of lines in each letter.

Use crayon, colored pencils, or markers to complete these 2 coloring pages.

1. Scratch art paper assignment:

You need to pick one of the papers for scratch art then the other you will color. You will need to use 2 small pieces of tape to attach the one paper to the front of the scratch paper. Like in class use a pencil or pen to trace the image onto the scratch paper then scratch with the stick to remove the black. Remember to have an extra piece of paper to rest your hand on so as not to transfer oil from your hand onto the scratch paper.

You will decide how much black to remove to give the image you picked to create an interesting design.

Just email me a picture of the completed scratch art page.

You have 2 pages to color. You can use either or both colored pencils and markers to fill these images with color.
